

LEAN. MEAN. GREEN.

Diesel Goes the Distance

Diesel provides the safest, least combustible, most reliable power for transporting approximately **55 percent** of America's elementary and secondary school students to and from school.

LEAN.

Diesel is the **most fuel-efficient** engine type.

1 gallon of diesel has **113% of the energy** of one gallon of gasoline.

Diesel buses have **better resale value.**

Diesel **outperforms** other fuels in operation range and fuel economy.

Diesel **510 mi**

Natural Gas **450 mi**

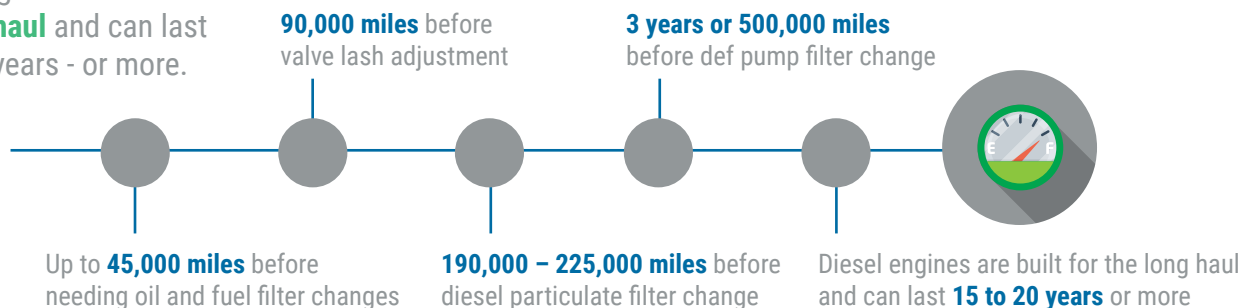

Gasoline **270 mi**

Propane **264 mi**

MEAN.

Diesel engines are built for the **long haul** and can last 15 to 20 years - or more.

GREEN.

Ultra-low sulfur diesel (ULSD) **cuts soot emissions**, keeping students and communities healthier.

Thomas built buses **exceed EPA & greenhouse gas standards** for 2021 in:

- Particulate matter
- Hydrocarbon emissions
- Carbon dioxide emissions

Every bus on the road **eliminates 36 cars.**

60 of today's Saf-T-Liner C2 school buses produce fewer combined emissions than **1 school bus** from 2002

Power. Proven Performance. Reliability.

Low emissions. | Best-in-class fuel efficiency. | Low total cost of ownership.
